

BUILDING THE NETWORK CABLE: STEP BY STEP

Step 1	Place the sleeve on the cable	
Step 2	Strip the cable with the cutter to a length of +/- 5 cm. Be careful not to overtighten to avoid damaging the wires.	
Step 3	Untwist the wires and cut the plastic separation in the centre with the cutting pliers	
Step 4	Aligns the threads in the required colour sequence	
Step 5	Place the wires in the RJ45 plug in the right order. They must pass through the plug.	
Step 6	Using the pliers, crimp the connector.	

Step 7 Cut wires protruding from the connector.

Step 8 Use the pliers to crimp the dovetail.

Step 9 Place the protective sleeve.

Step 10 Repeat for the other end of the cable and then present your cable to the game master for testing
